Working Prototype Known Problems Report
Problematica

<u>List of functions not working:</u>
- There are no restrictions on the payment input form on the problem page (default/problem), so users can enter any type of input and will reach an error message if they input anything other than an integer value. This can be solved by refactoring problem.html such that the input is restricted.
- There are issues regarding responsivity of site on varied screen sizes. The site was developed with a desktop-first approach.
- The dynamic display of donor images by percentage of contribution does not yet display properly after 8 or so donors. It is also not yet responsive. More work needs to be put into this feature.

<u>List of test cases for acceptance test:</u>
- test search()
- test is_found_in_database()
- test is_user_same_as()
- test get_id()
- test get_bio()
- test get_academic_fields()
- test get_firstname()
- test get_lastname()
- test get_submitted_solutions()
- test get_solved_problems()
- test get_num_problems_solved()
- test get_total_money_donated()
- test get_clean_total_money_donated()
- test set_bio()

<u>Failed Unit Tests:</u>
- test get_donations
- test get_donated_problems
- test set_academic_fields
- test get_first_name
